

GÜLLÜ KIZILTAŞ ŞENDUR

Associate Professor, Faculty of Engineering and Natural Sciences
Room: 1075
Sabanci University
Orhanli, Tuzla, 34956
Istanbul, Turkey
e-mail: gkiziltas@sabanciuniv.edu
Phone: + 90-216-4839584
Fax: +90-216-4839550

- Education** **University of Michigan** **Ann Arbor, MI**
Ph. D. in Mechanical Engineering ***Sep'98–May'03***
Thesis Co-Supervisors: Professor Noboru Kikuchi and Professor John L. Volakis
- Topology optimization of high frequency EM applications via Solid Isotropic Material with Penalization (SIMP) method.
- Course Highlights:** Design Optimization, FEM in Mechanical Engineering and Electromagnetics, Theory of Solid Continua, Antenna Design, Making Decision under Uncertainty, Homogenization Design Method for Structures, Materials, and Mechanisms
- Middle East Technical University** **Ankara, TURKEY**
M.Sc. in Mechanical Engineering ***Sep'95 - May'98***
Thesis Co-Supervisors: Professor Tuna Balkan and Professor Bilgin Kaftanoglu
- Computer aided analysis and optimal design of automotive brakes and clutches for enhanced transmission system performance
- Course Highlights:** Variational Methods, Computer Aided Design, Tribology, Numerical Methods, Fracture Mechanics, Linear Programming
- Middle East Technical University** **Ankara, TURKEY**
B.Sc. in Mechanical Engineering ***Sep'91 - Aug'95***
- Design and construction of a single source driven floating machine to pick up a submerged object under the water and place it aside
- Course Highlights:** Mechanical Design, Finite Element Analysis, Dynamics of Machinery, Pipeline Engineering, Gas Dynamics, Engineering Economics
- Honors** **Young Scientist Award**, the Turkish Academy of Sciences, 2008
Graduating Class Teaching Award, Sabanci University, 2008
CAREER Award, supported by TUBITAK, 2007-10
Marie Curie International Reintegration Grant, EU 6th Framework, 2006
Student Fellowship, 7th US National Congress on Computational Mechanics, 2003
Best Paper Award, Applied Computational Electromagnetics Society (ACES), 2002
Nomination, Marian Sarah Parker women leadership award, University of Michigan, 2002
Distinguished Leadership Award, College of Engineering, University of Michigan, 2001
Peer Woman Advisor, University of Michigan, 2000-2003
PhD Fellowship, Mechanical Engineering Department, University of Michigan, 1998
Graduate Fellowship, The Scientific and Technical Research Council of Turkey, 1998
Undergraduate Fellowship, Turkish Council of Higher Education, 1990-1995

- Experience Sabancı University, FENS, Mechatronics Program** **Istanbul, Turkey**
Associate Professor **Sept. 2012– present**
Assistant Professor **Sept. 2005–present**
Sabancı University Nanotechnology and Application Center
- Supervising graduate/undergraduate students on:
 - Design and fabrication of novel composite substrates for biomedical, electromagnetic and mechatronics applications
 - 3D composites of Multi-material magneto-dielectrics
 - Ceramic-Polymer Composites for tissue engineering
 - Domain-specific design of mechatronics systems
 - Topology optimization and modeling of large scale and/or multi-disciplinary coupled systems.
 - Teaching undergraduate/graduate courses
 - Program Coordinator

- University of Michigan, EECS Dept., Radiation Lab.** **Ann Arbor, MI**
Post Doctoral Research Fellow **May'03– Aug'05**
- Continued research on design, analysis and fabrication of miniaturized novel antennas for UHF frequencies
 - Investigated high-contrast material behavior to improve antenna radiation characteristics for network-centric future military platforms
 - Coordinated design (Radiation Lab.), testing (ElectroScience Lab.) and fabrication teams (Material Science Department) at the University of Michigan and the Ohio State University

- Ohio State University, ECE Dept., ElectroScience Lab.** **Columbus, OH**
Post Doctoral Research Fellow **May '03– Aug '05**
- Designed non-intuitive VHF frequency conformal antennas with superior performance (ultra-wideband) on engineered meta-material substrates (ONR Project)

- University of Michigan, ME Dept.** **Ann Arbor, MI**
Graduate Student Research Assistant **1998– 2003**
- Proposed the first topology optimization method for electromagnetic applications
 - Developed the first integrated material and conductor shape topology design algorithm for electromagnetic applications
 - Designed 3D dielectric material topologies for a band-pass spectral filter working in THz region (Knoll Atomic Power Laboratory Project)
 - Studied and fabricated innovative, non-intuitive 3D dielectric material distributions for miniaturized antenna bandwidth enhancements (DARPA Project)
 - Performed an exact sensitivity analysis for complex-valued EM performance functions
 - Automated the optimal design process for synthesizing new materials with customized properties
 - Worked on size, shape and material optimization algorithms for RF applications (NSF project)

- Integrated a full wave finite element code (FE-BI) with sequential linear programming (SLP) optimizer in FORTRAN

Middle East Technical University, ME Dept.
Graduate Student Research Assistant

Ankara, TURKEY
1995– 1998

- Optimally designed size and material combinations of automotive brakes and clutches for maximum power transmission performance and minimum size requirement
- Developed an optimization design algorithm using the Powell Method and developed user-interface in C++ for the integrated power transmission design of a FIAT truck
- Studied thermal failure modes of friction type brakes and clutches and the temperature and pressure dependence of standard friction material pairs

Funded Research (PI/Supervisor)

- “Proof of Principle of Energy Storage in Coherent Quantum Systems”, Lockheed Martin Corporate Engineering Technology, USA (2014-2015), 150,000 \$
- “Design and Fabrication of Ceramic-Polymer based Composite Material Substrates for Conformal Antenna Applications,” TUBITAK, (2013-2015), 324,887 TL
- “Material Microstructure Synthesis of Conformal Low Loss Electromagnetic Materials,” TUBA, (2008-2011), 60,000TL
- “Design and Fabrication of Artificial Dielectric Composites via Topology Optimization for Antenna Performance Enhancements,” TUBITAK, (2006-2009), 194,826 TL
- “Optimal design and fabrication of electromagnetic metamaterials for millimeter and microwave applications,” EU-6th Framework MC-IRG, (2006-2008), 80,000 Euro

Funded Research (Researcher)

- “Micro-CT tomography: 3D imaging of the painting support and paint; investigation of internal structure and layers of drawings, changes of figures/motifs-Looking through Osman Hamdi Bey Paintings”, Merryll Lynch, Researcher, (2005-2017), Budget: 70000 \$
- “Tissue Engineering using multi-functional scaffolds with stem cells,” Sabanci University Internal Grant, PI: Bahattin Koc, (2012-2015), Budget: 151,600 TL
- “Sabancı University Nanotechnology Research and Application Center (SU-NAC),” DPT, PI: Kemal Inan, (2009-2013), Budget: 27,000,000 TL
- “Modeling, Design, and Manufacturing of Nano-Optical Systems,” TUBITAK, PI: Kursat Sendur, (2009-2012), Budget: 261,791 TL
- “Robot Assisted Rehabilitation System,” TUBITAK, PI: Volkan Patoglu, (2007-2010), Budget: 306,305 YTL
- “Conformal Antenna, Array Analysis and Design using Novel Electronic Materials,” MURI-AFOSR, PI: John L. Volakis, (2004-2009) Budget: 5,232,000\$
- “Ultra-Wideband Conformal Antennas,” ONR, PI: John L. Volakis, (2004-2005), Budget: 500,000\$
- “Metamaterials Design,” DARPA, PI: Prof. John W. Halloran, (2001-2005), Budget: 5,000,000\$
- “Design of a Thermophotovoltaic Filter,” KAPL-Lockheed Martin, PI: John L. Volakis, (2000-2001), Budget: 250,000\$

Courses Taught

Sabanci University, FENS, Mechatronics

Istanbul, Turkey
Sept. '05–present

- ME 412/512 Introduction to the Finite Element Method
- EE 518 Multi-Disciplinary Design Optimization
- ENS 204 Mechanics
- ME 301 Mechanical Systems I
- ME 408 Mechatronics System Design
- ME 411 Mechanical System Design

Service

Member:

- The American Society of Mechanical Engineers (ASME)
- The Institute of Electrical and Electronics Engineers (IEEE)
- The American Ceramic Society (ACerS)
- Danish Center for Applied Mathematics and Mechanics (DCAMM)

Reviewer:

- IEEE Transactions on Microwave Theory and Techniques
- Institution of Engineering and Technology Electronic Letters
- IEEE Transactions on Antennas and Propagation
- ASME Journal of Mechanical Design
- Journal of the American Ceramic Society
- Computer Methods in Applied Mechanics and Engineering

List of Publications

Book Chapters

G. Kiziltas and S. Koulouridis, “Antenna Design and Optimization using FE-BI Methods” in Frequency Domain Hybrid Finite Element Methods in Electromagnetics, ISBN: 1598290800, MC Publishers, 2006

M. Cakmakci, **G. Kiziltas** and U. Durak, "Simulation-based engineering", in Guide to Simulation-Based Disciplines: Advancing Our Computational Future, M. Saurabh, U. Durak, and T. Oren (eds.), NY, USA: Springer International Publishing, July 2017

G. Kiziltas and M. S. Aydin, “Use of micro-CT in Computational Material Design and Fabrication Studies”, in Micro-computed Tomography (micro-CT) in Medicine and Engineering, K. Orhan (ed.), NY Springer Nature (to be published in January 2019)

G. Kiziltas, M. Papila, B. Yilmaz and K. Bilge, “Challenges in Micro-CT characterization of composites”, in Micro-computed Tomography (micro-CT) in Medicine and Engineering, K. Orhan (ed.), NY Springer Nature, (to be published in January 2019)

Journal Articles

1. **G. Kiziltas**, “Design and Fabrication of Three Dimensional Multi-Dielectrics for a Miniaturized UHF SATCOM Antenna,”, *in preparation for IEEE Transactions on Microwave Theory and Techniques*.

2. F. Gul Ince, M. G. Eskin, I. Sacligil, **G. Kiziltas**, "Fabrication of Flexible Low-loss Polymer/Ceramic Composites with Anisotropic Dielectric Behavior via Freeze Casting," *in preparation for the Journal of European Ceramic Society*.
3. A. Kamadan, **G. Kiziltas**, V. Patoglu, "Coupled Optimal Design and Control of Series-Elastic and Adaptive Impedance Actuators," *in preparation for IEEE Transactions on Robotics*.
4. H. Yigit, M. G. Eskin and **G. Kiziltas**, "Effective material modeling of electromagnetic nano-metamaterials using homogenization based topology optimization," *in preparation for Journal of Computational Physics*.
5. B. Yilmaz, K. Bilge, G. Başer, **G. Kiziltas**, M. Papila, "Investigation of yarn number driven architecture and tensile behavior of Glass fiber Non-Crimp Fabric (NCF) Composites: A two scale perspective analysis based on micro-CT characterization," *in preparation for Composites Part B*.
6. O. Sayginer and **G. Kiziltas**, "Design and Fabrication of Textured Conformal Antennas via Tape Casting," *IEEE Transactions of Antennas and Propagation (under review)*.
7. A. E. Bayrak and **G. Kiziltas**, "Level-set based topology optimization of a patch antenna," *Journal of Computational Physics (under review)*
8. A. Kamadan, **G. Kiziltas**, and V. Patoglu, "A Unified Design Selection Framework for System-Optimal Compliant Actuation," *Robotica (under review with minor revisions, April 2018)*.
9. I. Berkun and **G. Kiziltas**, "Optimization of Dry Powder Deposition Parameters for Production of Large Substrates using Functionally Graded Ceramics", *International Journal of Applied Ceramic Technology*, February 2018. <https://doi.org/10.1111/ijac.12887>
